

Practice Time vs. Misses

Instructions: Below is an example of how to properly fill out your practice progress graph.

Example: Johnny West practiced for 2 hours and missed 5 times. Johnny recorded the number of misses by coloring in the boxes on his graph for 2 hours of practice. He went out and practiced for 3 hours and only missed 3 times. He recorded his misses for 3 hours of practice. Johnny went out and practiced for 4 hours and only missed once that time! He recorded his miss for the 4 hours of practice and found that he was improving with more practice. Track your progress on the graph above just like Johnny.
